

Fitting Instructions - Step 1

- 1 Decide where your display will start - (We would advise working left to right)
- 2 Attach one of the top connectors, this disconnects into 2x sections + secure the washer section to the wall
- 3 Section 1 is the washer section + drill wall hole + add a raw plug + secure washer section using a screw
- 4 Once secured into place + re-connect the other section + you should now have a hanging cable in place

Fitting Instructions - Step 2

- 1 When deciding the location of the next cable
- 2 We would recommend that you lay the acrylic on the floor and attach the supplied single grippers to it
- 3 Once you have them attached - measure the gap between both grippers (left & right)
- 4 You now have the correct measurement!
- 5 Now repeat "Fitting instructions - Step 1"
- 6 *At this point you should have 2x top wall connectors secured and the 2x cables hanging loose*

Fitting Instructions - Step 3

- 1 The cable supplied, each has a cable length of 3M - It is very rare that you will need all 3Ms
- 2 Hence you will need to cut-off the excess - **DON'T DO THIS YET**

Fitting Instructions - Step 4

1x A3 Acrylic Order - Fit the cable and add 2x Single Grippers to each cable

2x A3 Acrylic Order - Fit the cable and add 4x Single Grippers to each cable

3x A3 Acrylic Order - Fit the cable and add 6x Single Grippers to each cable

Fitting Instructions - Step 5

- 1 Now for the bottom of the cables, plumb cable 1 and mark on the required connection area, now secure to your wall
- 2 Repeat this for cable 2
- 3 At this point you only need to cut the cable to the wanted length - take your time here - before cutting.....
- 4 Check how far the cable goes into the central Tensioner, over estimate the required length - **NOW CUT THE CABLE**
- 5 Now keep nibbling at the cable until you gain your TRUE WANTED LENGTH - Now repeat the process for the 2nd cable - that's it!
