## Wall Mounted - Poster A1 & A2 Flip Display

Ref: UKP8

### Fitting Instructions

*Parts*

2 x Metal Brackets

10 x Show Cards

10 x U-Pockets

20 x Show Card Grippers

#### Step 1

Decide where the lowest metal bracket is to be secured then, with a spirit level mark the wall with pencil through the pre-drilled holes, drill 2x holes and secure bracket to the wall using raw plugs and screw (not supplied) bracket should be facing upwards as this hides the bracket behind the show cards when completed

#### Step 2:

Attach grippers top and bottom to 1 x show card however; ensure the top slit on the show card is facing upwards, secure the bottom gripper in the bottom corner with the metal part pointing downwards then, add top gripper with the metal part facing upwards

#### Step 3:

Place bottom gripper into the first of 10 holes then, place the top gripper into the top bracket first hole then, mark the wall for attaching the top bracket, remove show card and spirit level to bottom bracket then, level across, finally attach the top bracket with the bracket facing downwards

#### Step 4:

Re-insert first show card to bottom bracket then, loosen top bracket, then attach to the top bracket first hole, then retighten the gripper

#### Congratulations:

The first show card is completed, now repeat for the remaining 9x show cards, *remember* to have the slits facing upwards

#### Step 5:

At this point you should have the complete assembly support onto your wall with 10x show cards attached, now the posters need inserting

#### Step 6:

Assuming you have your posters ready, with each poster slid into the supplied U-Pocket then, slide these into your show card, repeat for all show cards, the U-Pockets are designed to protect your posters from unsightly finger prints etc

#### Step 7:

Future alterations, just slide the U-Pocket out of the show card, replace the poster and re-slide back into the show card

#### Top Tip

Assuming your posters are standard thickness, you can add two posters per show card, hence 20 posters being advertised, your only concern is the gap between the show card moulded frames i.e. the top slits
