

LED Light Pockets - Looking to Purchase?

So, what is possible for your own cherished windows?

The '5' Basic Rules:

- 1 LED Pockets can be suspended on cables and rods and can help create a 'Stunning Display'
- 2 The Golden Rule with LED Displays = Each column can be 1, 2, 3 to a maximum of 4 LED's
- 3 Each additional column must have a gap between them, due to the power supply
- 4 Un-like standard acrylics - You cannot create seamless runs with LED Pockets
- 5 Compact and Deluxe versions have two *widths - these are all listed below:

LED = COMPACT	LED = DELUXE
*Widths are Cable to LED to Cable	*Widths are Cable to LED to Cable
