

Website Ref: **Window1**

- 4 x 4A Acrylics
- 2 x Cables, 4M lengths
- 16 x Single Grippers
- 0 x Double Grippers
- 2 x Top & Bottom Holders

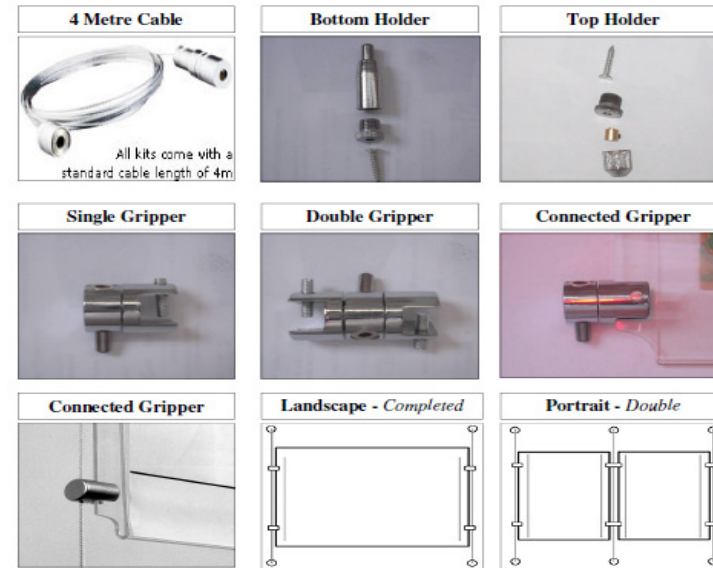

**Width 27cms**

### Index

Page 1 - **Parts to options & images**

Page 2 - **Fitting Instructions**

### Drawing:

- 1 We have created a crude drawing of the actual assembled unit
- 2 Cables supplied at 4M - Just cut to desired length
- 3 Listed as quick orders in either A4 Portrait or Landscape Acrylics
- 4 Page 1 reveals a single column - remaining pages reveals larger displays

### Need help?

- 1 We understand that clients may want a different set up
- 2 Please do not hesitate in calling us as we can help you with a perfect design
- 3 Tel: 0845 1080047 or 01244 371443

### Fitting Instructions - Step 1

- 1 Decide where your display will start - (We would advise working left to right)
- 2 Attach one of the top connectors to your top windowsill or ceiling (comes in 2x parts) connect the smaller section
- 3 **Warning** = Top connectors supports all the weight so, ensure a secure fitting, use your own unique screws if necessary!
- 4 Thread supplied cable through the second section and screw bass connector tightly to the cable, screw this to the top connector

### Fitting Instructions - Step 2

- 1 When deciding the location of the next cable
- 2 We would recommend that you lay the acrylic on the floor and attach the required grippers to it
- 3 Once you have them attached - measure the gap between the gripper cable holding section on both grippers (left & right)
- 4 You now have the correct measurement!
- 5 Now connect cable two to the top windowsill or ceiling
- 6 *At this point you should have two cables hanging and single and double grippers attached*

### Fitting Instructions - Step 3

- 1 Pending how many columns you are adding - be they a seamless run or individual columns  
**Individual Columns** - Repeat the above exercise however; make sure you add the required gaps between the displays  
**Seamless Columns** - *Do not forget that the double grippers are wider than the single grippers - you must allow for this!*

### Fitting Instructions - Step 4

- 1 Acrylics - Decide where the first acrylic wants to be attached
- 2 Now move the grippers to the required location, secure to the cable - then, secure to the acrylic
- 3 At this point your acrylic should be attached in four corners and onto two cables
- 4 Repeat this process left to right ensuring acrylics are level all the way across the display
- 5 2nd row - we recommend a gap between acrylics of **5cms**
- 6 Repeat this process for the 2nd row and keep repeating for all desired / ordered rows

### Fitting Instructions - Step 5

- 1 Bottom connector, plumb the cable and mark on the required connection area, now secure smaller section with a screw
- 2 Once completed re-attach the top section
- 3 This is spring loaded - hang the cable flush with the floor then, cut to desired length then, insert into the bottom section
- 4 If the cable is still loose, re-cut the cable TAKE YOUR TIME - and re-try
- 5 Big warning - If you rush the cable cutting and cut it to short - you are bugged, so, take your time - DO NOT RUSH
